Experience

ClickPe YC23 **Bangalore, India**
Founding Engineer *Jun 2024 – Ongoing*
- Implemented a Loan Management System (LMS) using Python and AWS Lambda, improving operational efficiency by 25% through process automation.
- Developed a custom Apache Fineract wrapper with Alembic and SQLAlchemy for smooth database migrations, minimizing manual intervention.
- Designed and deployed microservices on AWS (VPC, ALB, Auto Scaling Groups, ECR, CloudFront), ensuring high availability and performance.
- Integrated third-party services for credit scoring (CIBIL), bank statement analysis, and automated email workflows via AWS SES, driving 40% more automation.
- Enhanced credit underwriting workflows by migrating from Camunda v7 to v8, improving scalability and process reliability.
- Deployed Temporal on AWS EKS and ECS, and built a Go-based orchestration service for workflow management, leveraging Temporal's capabilities to boost scalability and fault tolerance.
- Automated marketing, operations, and HR workflows with self-hosted agentic systems on n8n, reducing operational overhead.
- Created voice calling agents with TTS/STT, advanced RAG and NLP layers, integrated LiveKit on AWS EKS, increasing lead conversion rates by 30–40%.
- **Technical Stack:** Python, Go, SQLAlchemy, Alembic, Apache Fineract, AWS (Lambda, EKS, ECS, ECR, VPC, ALB, Auto Scaling Groups, CloudFront, SES), Camunda, Temporal, Helm, Kubernetes, n8n, LiveKit, RAG/NLP, TTS/STT.

Liveasy **Remote**
Backend Developer Intern *Dec 2023 – Jun 2024*
- Implemented JWT-based authentication in Spring Boot, enhancing application security.
- Built and optimized CI/CD pipelines using GitHub Actions and Docker, reducing deployment time by 30%.
- Configured AWS ALB and WAF, ensuring secure and optimized traffic management with 20% faster response times.
- Automated tasks with cron jobs, reducing manual workloads and improving efficiency.
- Set up real-time monitoring with Grafana, Loki, and Promtail, enhancing system reliability and visibility.
- **Skills:** Spring Boot, JWT, CI/CD (GitHub Actions, Docker), AWS (ALB, WAF), Grafana, Loki, Promtail.

Technical Skills

Languages: Java, Python, Go

Java Development: Spring Boot, Spring Security, JPA, Microservices, Kafka, Spring Cloud

Python Development: Flask, SQLAlchemy, Alembic, FastAPI

Databases: MySQL, PostgreSQL, MongoDB, Elasticsearch, DynamoDB

Cloud & DevOps: AWS (EC2, EKS, ECS, CloudFront, Lambda, S3), Docker, CI/CD, Nginx

Others: Grafana, Postman, Android Development, Terraform, Kubernetes, Helm

Projects

Cloud Monitoring & Observability Platform **Mar 2024 - Ongoing**
Python, AWS Lambda, Serverless, CloudWatch, Elasticsearch, Grafana, Prometheus, Docker
- Built enterprise-grade monitoring solution for AWS serverless applications with Python Lambda functions, achieving 99.9% system visibility and reducing MTTR by 60%.
- Engineered ELK stack deployment on EC2 with Docker Compose for real-time log analytics.
- Integrated Prometheus and Grafana dashboards with CloudWatch metrics for comprehensive monitoring and visualization.
- Implemented automated alerting system with CloudWatch alarms, SNS notifications, and PostgreSQL audit trails for proactive incident management.

QuizMate Backend **Dec 2023 - Feb 2024**
Spring Boot, AWS, Docker, CI/CD
- Developed a secure quiz platform backend with Spring Security and MySQL integration.
- Set up CI/CD pipelines with GitHub Actions, reducing deployment time by 30%.
- Integrated Cloudinary for image management and Vertex AI for dynamic hint generation.
- Ensured high availability with Dockerized deployment on AWS EC2.

Education

Harcourt Butler Technical University **Kanpur, Uttar Pradesh**
Bachelor of Technology in Information Technology

Accomplishments

- Integrated open-source tools such as **Apache Fineract**, **Mifos**, **Temporal**, **Camunda (v7 & v8)**, **Metabase**, **Grafana**, **Keycloak**, **ELK Stack**, **n8n**, and **LiveKit**, boosting workflow efficiency by 40%.
- Solved over **500+ competitive programming problems** across platforms, including 400+ on **LeetCode**.
- Contributed to **Hacktoberfest 2022**, enhancing a College Community Android App and driving collaboration.
