2025 B.Tech CSE Graduate | 430+ DSA Problems Solved

Education

Shri Govindram Seksaria Institute of Technology and Science — **Indore, Madhya Pradesh**

Bachelor of Technology in Computer Science — *October 2021 – May 2025*

Experience

Systango — Indore, India

Backend Developer (SDE I) — May 2025 – Present

- Developed 15+ backend APIs using **Koa**, **TypeScript**, and **PostgreSQL**; reduced average response time by 30% by adding targeted indexes on high-frequency read paths and optimizing slow query execution plans.
- Built leaderboard and ranking systems using PostgreSQL `RANK()` window function for real-time score ordering, eliminating application-level sorting logic.
- Designed transactional data migration scripts for 20K+ records with 500-record batch sizes, idempotent retry logic on transient DB failures, and full rollback support on partial failure — ensuring zero data corruption across deployments.
- Extended an existing cron job with a league game aggregation function to compute total games played, per-league breakdowns, and active league counts — delivering async email summaries to the platform owner.
- Collaborated with cross-functional teams in an agile development environment to design, implement, and deliver backend features across multiple product releases.

Systango — Indore, India

Backend Developer Intern — February 2025 – April 2025

- Developed OTP-based authentication and JWT authorization modules in **NestJS**, implementing refresh token rotation, token expiry handling, and role-scoped access across customer and vendor contexts.
- Implemented role-based access control, optimized REST APIs, and documented technical solutions using TypeScript and PostgreSQL.

GirlScript Summer of Code — Remote

Open Source Contributor — May 2024 – August 2024

- Refactored Django view logic and optimized ORM queries in a production platform, reducing average API response time by 25% through query consolidation and selective field fetching.
- Merged 9+ pull requests and ranked in the top 25% among 2000+ contributors in GirlScript Summer of Code 2024.

Technical Skills

Core CS: Data Structures, Algorithms, Algorithm Design, Complexity Analysis, Object-Oriented Design, DBMS, Operating Systems, Computer Networks, Problem Solving

Languages: Java, C++, Python, TypeScript

Frameworks/Runtimes: Node.js, Koa, NestJS, Django, REST APIs

Databases: PostgreSQL, MySQL, Firebase Realtime

Tools: Docker, Git, AWS S3, Postman, Swagger, VS Code

Projects

Strat-O-Matic Cloud Gaming Platform | *Koa, TypeScript, Node.js, MySQL, REST APIs, Firebase Realtime* **2026**

- Developed Node.js backend services within a distributed multi-tier architecture spanning a **C++** game engine and **Java** services, integrating cross-service communication via REST API calls from Node to Java layer.
- Optimized leaderboard read queries using indexed views and query-level caching strategies, reducing response latency for high-frequency rank lookups.

WhatsApp AI Sales Assistant | *n8n, PostgreSQL, Gemini AI, Webhooks, REST APIs* **2026**

- Built an AI-powered WhatsApp sales assistant using n8n, Gemini, and PostgreSQL — featuring per-message chat history, keyword-based intent classification, and a structured JSON response pipeline routing to text or image carousel outputs.
- Designed webhook-triggered product lookup across three PostgreSQL tables with AI-driven filtering and dynamic caption generation, scaling owner's daily customer handling from 30–40 to 200–300 without additional staff.

Everywear – E-commerce Platform | *NestJS, PostgreSQL, TypeORM, AWS S3, Docker, Razorpay* **May 2025**

- Built REST APIs for customer, vendor, and admin workflows with Google OAuth, Razorpay, and AWS S3 integration.
- Designed scalable PostgreSQL schemas using TypeORM with indexed foreign keys across customer, vendor, and product entities; documented all endpoints with Swagger.

Programming Achievements

- Solved 430+ Data Structures and Algorithms problems involving algorithm design, complexity analysis, arrays, trees, graphs, and dynamic programming.
- Achieved Rank #4580 in Naukri.com Young Turks – Coding Category.
