## Professional Experience

**Dice** Pune, India
*Backend Developer* Aug 2024 - April 2025

- Developed a complex workflow implementation that processes data from HRMS/ERP integrations, merging outputs in a linked list structure, and storing final results in an S3 bucket with URLs saved in the database.
- Dockerized the integration project and implemented a GitLab CI/CD pipeline for efficient image management, enabling automated pull and push processes for seamless deployment and version control.

**AgriVision4U** Remote, India
*Full-Stack Developer* June 2024 - Aug 2024

- Built the backend for features.com from scratch using Nest.js with TypeScript, integrating services such as Cloudinary for CDN management and implementing a comprehensive chat service.
- Implemented location-based mapping for posts and businesses, increasing local engagement and platform utility by 25%.

**Peruse** Remote, India
*Backend Developer* Nov 2023 - Mar 2024

- Developed a role-based authentication system with custom and social logins (Google, Outlook) that increased user trust and retention rates by 50%.
- Created functionalities for interview scheduling integrated with Google Calendar to streamline the recruitment process.

**Giakaa** Remote, India
*Frontend Developer* Sept 2023 - Dec 2023

- Built UI components using Next.js, TailwindCSS, Framer Motion, and TypeScript, leveraging Context API and advanced state management techniques, achieving a 15% increase in user retention.
- Designed complex components including a custom carousel, interactive timeline, and typing animations with Higher Order Components card which change content on hover, resulting in a 35% boost in user engagement.

## Projects

**Neural Knights** *Python, Typescript, Javascript, Flask, TailwindCSS* nknights.vercel.app
An interactive platform for teachers and students, incorporating gamified learning modules; increased student engagement by 40% and improved overall course completion rates by 25%.

**SnapSyntax** *Typescript, Prisma ORM, Next.js, React.js, PostgreSQL* snapsyntax.vercel.app
A code snippets generation and collaboration platform used to create engaging social media type snippets, increasing user engagement by 35% and reach by 20%.

**PDF Chat Application** *Langchain, FastAPI* github.com/mustafaazad03/fast-API-backend-AI-Planet
PDF chat application that allows users to upload PDFs, ask questions about the content, retrieve chat history, and delete PDFs. The backend leverages various services, including Supabase for storage and Langchain for natural language processing.

## Skills

| | |
|---|---|
| Landuage: | Typescript, Javascript, Python, Java |
| Backend: | Nest.js, Flask, FastAPI, Express.js, Node.js, JWT |
| DevOps: | AWS ( IAM service, S3 Bucket, EC2 Instance, Elastic Bean Stack ), Google Cloud |
| Databases: | PostgreSQL, MongoDB, MySQL |

## Awards & Extra Curricular

**Runner-Up Intel One API Hackathon** Intel India Corporation
Competed from 400+ teams in this National Hackathon by crafting a student learning platform. July 2023

**Organizer of Invento : Central India's Largest Techfest** IET-DAVV, Indore
Directed the official website, enhanced social media presence by 40%, and secured 5 sponsors. October 2023

## Education

**IET-DAVV, Indore** Indore, India
Bachelor of Engineering Computer Science and Engineering 2021 - 2025
