Experience

AI Engineer *Oct 2025 – Present*
Senda *Remote*

- Architected a Django-based agentic platform leveraging **LangGraph** for workflow orchestration and an **MCP-based tool layer** for standardized external system integrations, parallelizing data ingestion, analysis, and report generation workflows to reduce portfolio report turnaround from **3–4 hours to under 60 seconds.**
- Designed a **monthly Apache Iceberg partitioning strategy on AWS S3** for **20+ years of financial data**, reducing partitions from **7,000+ daily to ~240 monthly** (**~97% reduction**) while lowering metadata overhead and preserving month-range pruning.
- Deployed and scaled a production-grade multi-agent conversational AI chatbot on **AWS ECS** for **500+ users**, while leveraging **LangSmith** to create and run **100+ automated evaluations** for agent performance, reliability, and workflow validation.

AI/ML Engineer Intern *Apr 2025 – Jul 2025*
Attestr *Remote*

- Developed and fine-tuned CNN-based passive liveness (anti-spoofing) models for KYC verification, trained on approximately **20K images**, achieving **92% validation accuracy** under data-constrained conditions, and deployed the model on **Hugging Face** for real-time inference and evaluation.
- Containerized training and inference pipelines using Docker and trained models on **RunPod NVIDIA A100 GPUs**, reducing cloud training costs by approximately **50%** through optimized compute provisioning.
- Built observability dashboards with **Prometheus** and **Grafana** for a CNN-based liveness detection service, monitoring **1,000+ inference requests** and validating **p99 response times under 1 second**.

Featured Projects

Meruem – AI-Powered Data Analysis Platform *Next.js, FastAPI, MongoDB*

- Built an enterprise-grade data analysis automation platform that securely connects to private databases and delivers insights and visualizations without requiring manual SQL queries.
- Implemented workspace collaboration with role-based access control, enabling teams to share analytical findings while preserving strict data confidentiality.
- **Impact:** Reduced analysis turnaround time from **hours** to **minutes**.
- **Source Code:** GitHub Repository

Technical Skills

AI/ML: Generative AI, Agentic AI, RAG, LangChain, LangGraph, MCP, Computer Vision, Transformers
Languages: TypeScript,Python, JavaScript, C++, SQL
Full-Stack Development: FastAPI, Django, Node.js, React, Express.js
Cloud, Infrastructure & Data: Docker, AWS,MinIO ,PostgreSQL, MongoDB, Celery, Kafka,Redis, Git, Grafana, Prometheus, Langsmith , Langfuse

Education

Dayananda Sagar College of Engineering *Bangalore, India*
Bachelor of Engineering in Computer Science *2022 – 2026*

Achievements & Recognition

Competitive Programming *CodeForces*

- Specialist rating with **Max Rating: 1436** on CodeForces
- Ranked **Global 279** among 25,000+ participants in CodeChef Starters 119 (2025)
