Experience

AI Systems Engineer Intern *Oct 2025 – Present*
Senda *Remote*

- Architected a Django-based distributed workflow platform using **Celery**, **Redis**, and **LangGraph** to orchestrate parallel data ingestion, analysis, and report generation pipelines, reducing portfolio report turnaround from **3–4 hours to under 60 seconds**.
- Designed a **monthly Apache Iceberg partitioning strategy on AWS S3** for **20+ years of financial data**, reducing partitions from **7,000+ daily to ~240 monthly** (**~97% reduction**) while lowering metadata overhead and preserving month-range pruning.
- Engineered a Kafka-based ETL pipeline ingesting large-scale financial datasets into **MinIO** object storage, processing data across **30+ topics and 1000+ partitions** to support downstream analytics and AI workloads.

ML Engineer Intern *Apr 2025 – Jul 2025*
Attestr *Remote*

- Developed and fine-tuned a **DeePixBiS**-based passive face liveness (anti-spoofing) model for KYC verification, trained on approximately **20K images**, achieving **92% validation accuracy** under data-constrained conditions, and deployed optimized **ONNX Runtime** inference endpoints on **Hugging Face** for real-time evaluation.
- Built observability and performance monitoring dashboards with **Prometheus** and **Grafana** for an ONNX Runtime-based liveness detection service, analyzing inference latency across **1,000+ requests** and validating **p99 response times under 1 second**.

Featured Projects

Meruem – AI-Powered Data Analysis Platform *Next.js, FastAPI, MongoDB*

- Built an enterprise-grade data analysis automation platform that securely connects to private databases and delivers insights and visualizations without requiring manual SQL queries.
- Implemented workspace collaboration with role-based access control, enabling teams to share analytical findings while preserving strict data confidentiality.
- **Impact:** Reduced analysis turnaround time from **hours** to **minutes**.
- **Source Code:** GitHub Repository

Technical Skills

Languages: C++, C, Python, TypeScript, JavaScript, SQL
AI/ML: Generative AI, Agentic AI, RAG,ONNX Runtime, Transformers, LangGraph, MCP, Computer Vision
Systems & Tooling: Linux, Windows, GCC, CMake, Git
Backend & APIs: Django, FastAPI, Node.js, Express.js, Celery, Redis
Cloud, Infrastructure & Data: AWS, Docker, Kafka, Apache Iceberg, MinIO, PostgreSQL, MongoDB, Git
Observability: Prometheus, Grafana, LangSmith, Langfuse

Education

Dayananda Sagar College of Engineering *Bangalore, India*
Bachelor of Engineering in Computer Science *2022 – 2026*

Achievements & Recognition

Competitive Programming *CodeForces*

- Specialist (**Max Rating: 1436**) on Codeforces, solving algorithmic and data-structure problems primarily using **C++**.
- Ranked **Global 279** among 25,000+ participants in CodeChef Starters 119 (2025)
